

Factory Inspection Program Instructions

For instruments where:

- 1. The original warranty has expired, or
- 2. The recertification warranty has expired, or
- 3. An inspection is requested independent of Intoximeters' recertification program

Factory Inspections are done by appointment only. The standard turnaround time for a Factory Inspection is three business days (from the confirmed inspection date) plus transit time. If your instrument does not arrive one business day before confirmed inspection date, turnaround times may vary.

To schedule an appointment, send completed form to recert@intox.com

A confirmation of your confirmed inspection date will be emailed to you, along with shipping instructions. Do not ship dry gas cylinders with your instrument per federal law. Please be sure to ship the instrument so that it arrives at our facility the business day before your confirmed appointment date.

Factory Inspection Procedure

- Once we receive your evidential breath testing instrument (EBT), it will proceed through the initial check-out stage.
- If the EBT is in operating order it will continue through testing and leave Intoximeters within the third business day.*
- If the EBT needs repairs outside the scope of the Inspection, and we have pre-authorization, we will make all necessary repairs.*

- Instruments with known issues should utilize repair service to avoid additional inspection fees. Please contact customer service at 314.429.4000 for additional service.
- If we do not have pre-authorization for repairs, the process will stop and an estimate will be prepared for your authorization (\$40 estimate fee applies).*
- When the Inspection process is completed successfully, we will place an adhesive label on the EBT which will include the month and year of the successful Inspection.
- The EBT will then be returned to the shipping address provided and an invoice will be sent to the provided email address.

*Note: Turnaround times on instruments requiring additional repairs or authorization from the customer may take longer.

Intoximeters shall not be responsible for any custom software, custom configuration information, or memory data of customer information contained in, stored on, or integrated with any products returned to Intoximeters pursuant to any warranty, repair or Inspection.

Prior to the instrument's return for inspection, all stored data, settings and custom software required by the customer, should be saved or secured by the customer.

Instrument Type	Factory Inspection	Factory Inspection with ISO 17025 Calibration
Alco-Sensor® III	\$185.00 + freight	\$235.00 + freight
Alco-Sensor FST®	\$185.00 + freight	\$235.00 + freight
Alco-Sensor® IV & Alco-Sensor® IV with Memory	\$185.00 + freight	\$235.00 + freight
RBT IV (Alco-Sensor® IV with RBT Printer)	\$185.00 + freight	\$235.00 + freight
Alco-Sensor® VxL	\$185.00 + freight	\$235.00 + freight
RBT VxL (Alco-Sensor® VxL, Printer, Keyboard)	\$185.00 + freight	\$235.00 + freight
TRUE-Cal Device	\$ 54.00 + freight	\$104.00 + freight
Alcomonitor CC®	\$295.00 + freight	\$370.00 + freight

Factory Inspection Prices

For instruments where:

1. The original warranty has expired, or

2. The recertification warranty has expired, or 3. An inspection is requested independent of

Intoximeters' recertification program
